

Noninstitutional care for people with dementia in the Netherlands

Chantal Schouwenaar
PhD Candidate
School of Business and Economics

Dementia

Problems with vision

Refraining from social life

Problems with speaking

Forgetfulness

Character change

Restlessness

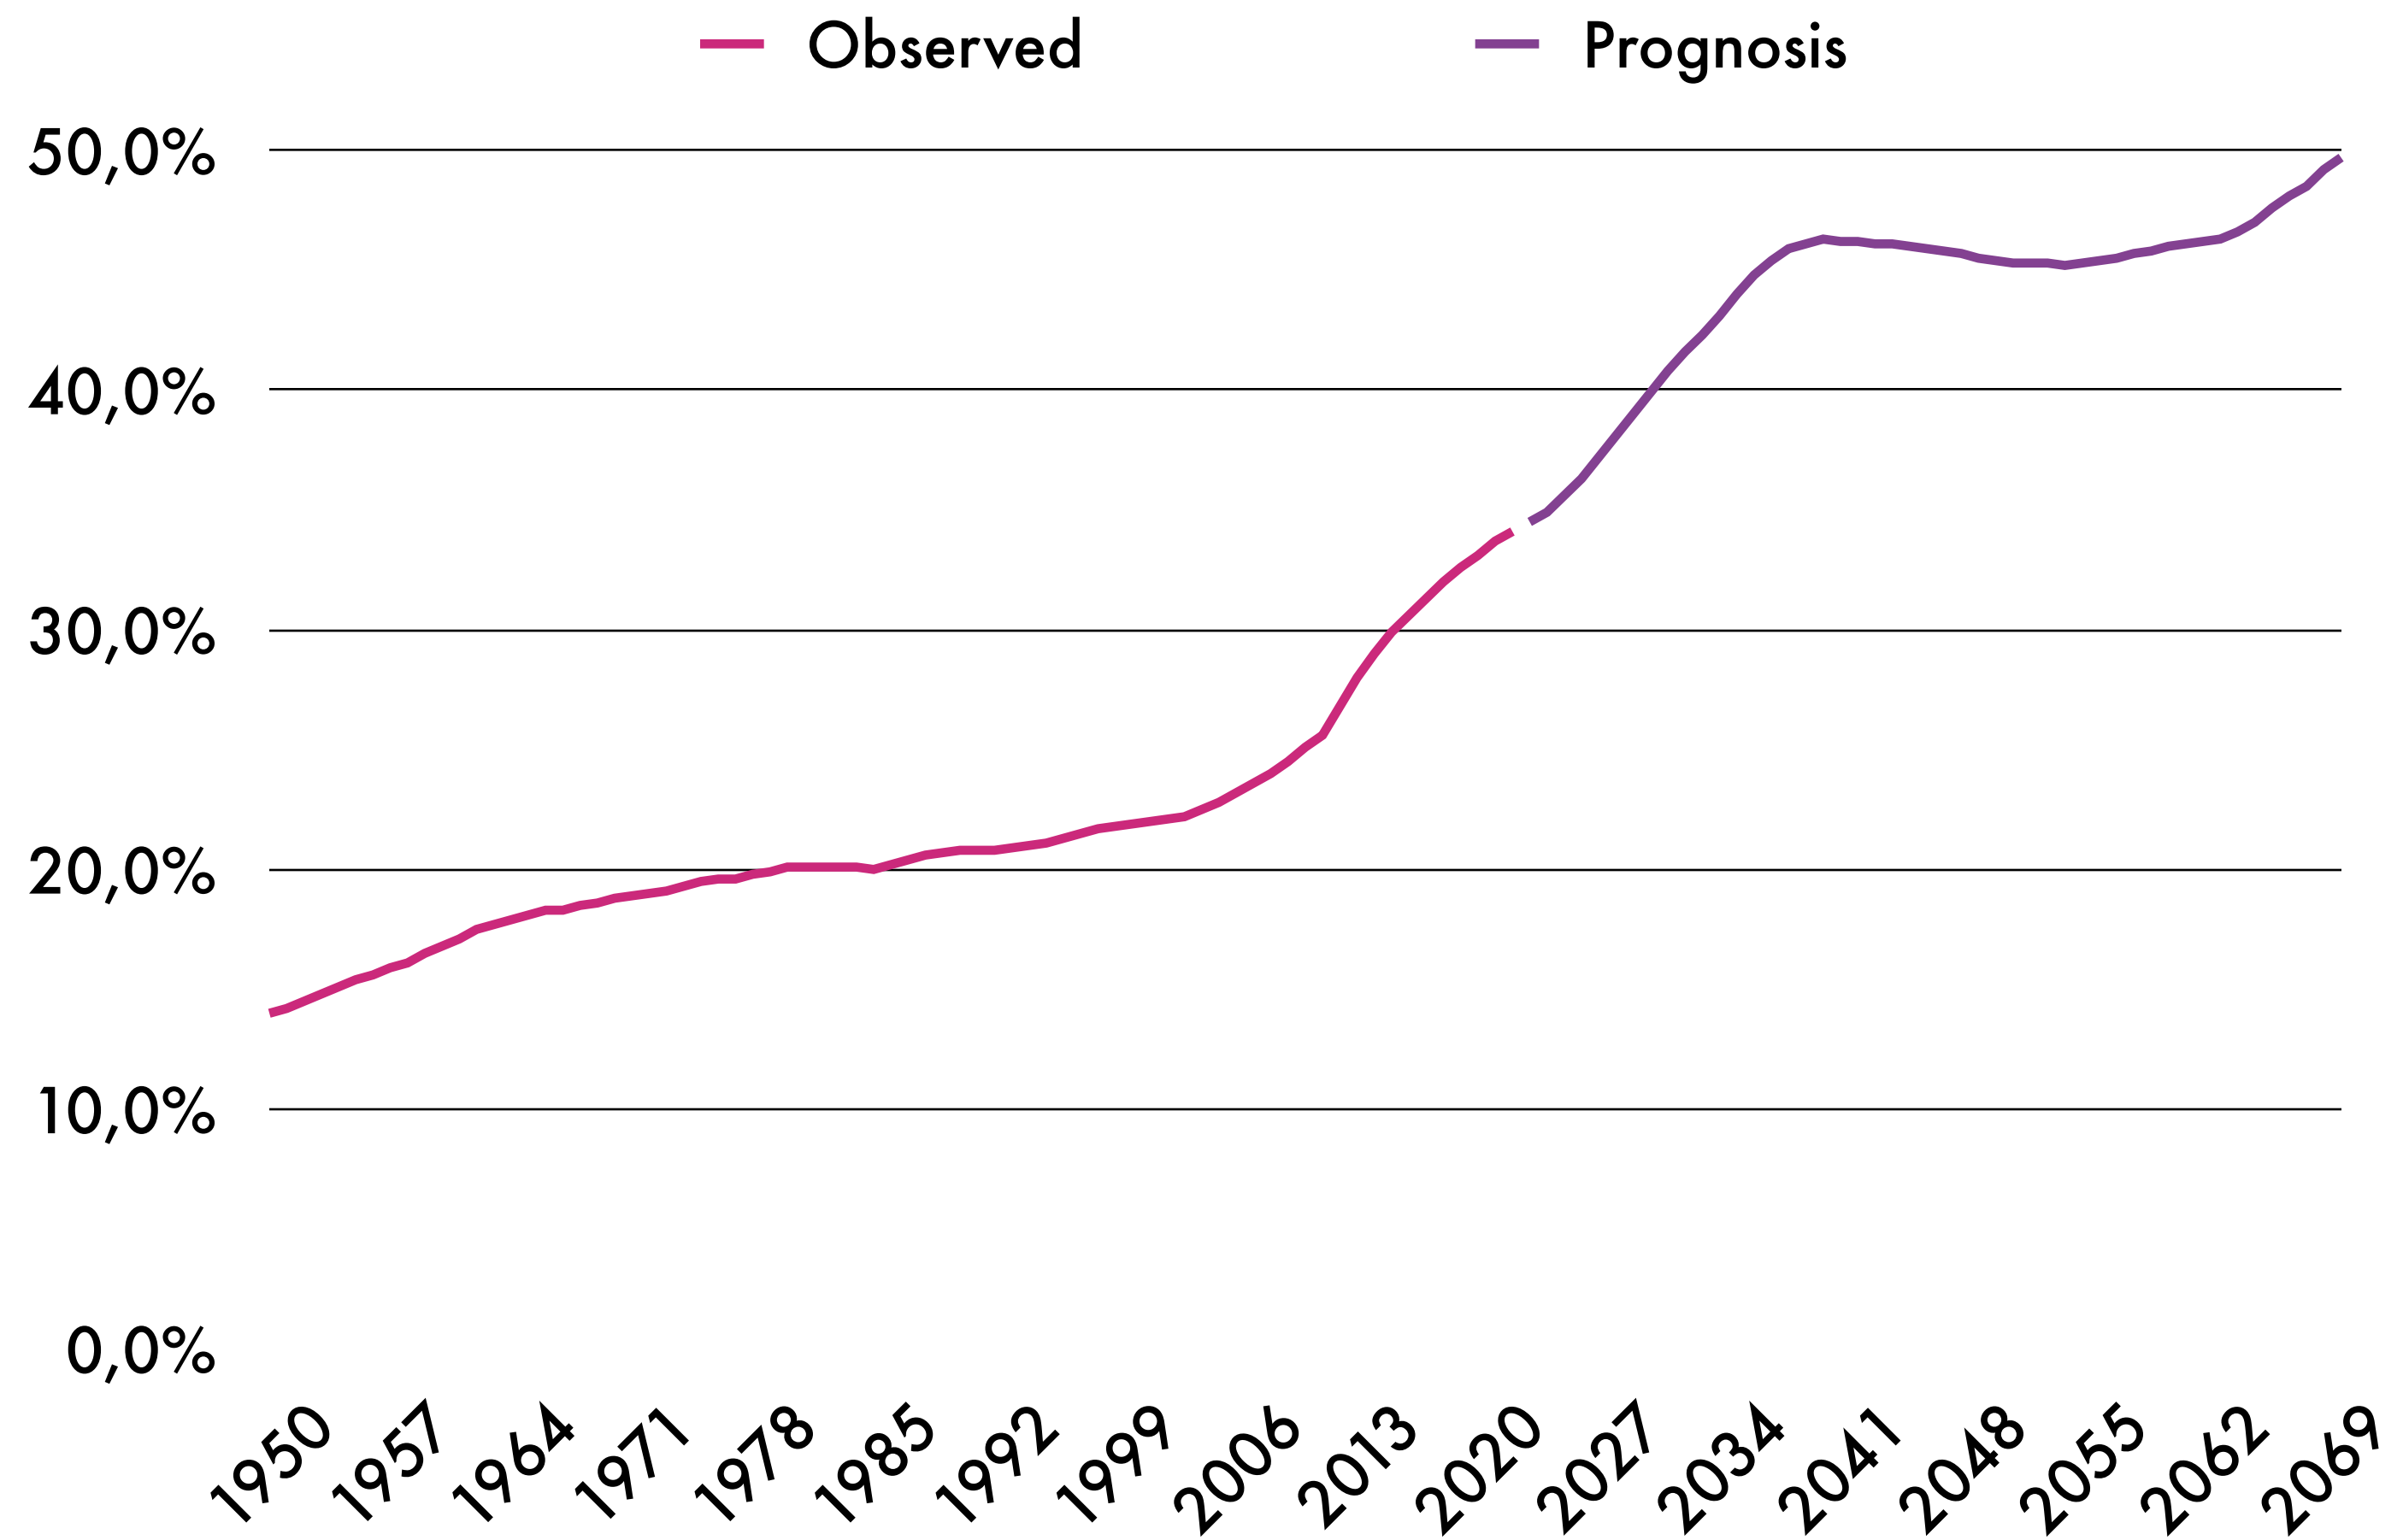

Losing stuff

Change in judgement

Struggling with daily tasks

Grey pressure

Ratio of aged > 65 and aged 20-65

CBS (2022); VWS (2022)

Research Question

How to improve noninstitutional care
for people with dementia in the
Netherlands?

Justification: Healthcare reform in 2015

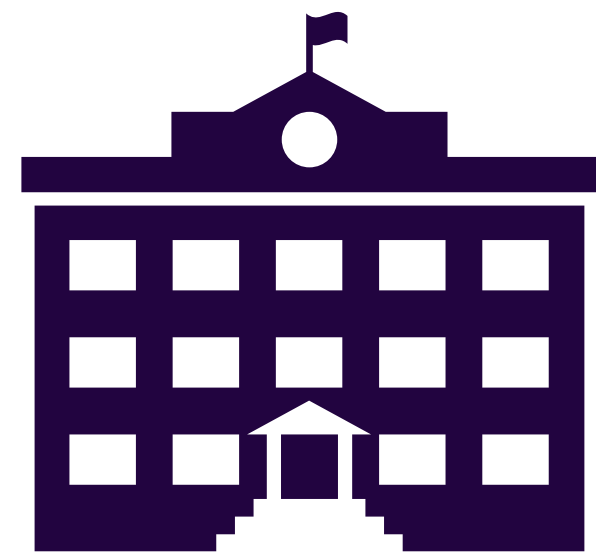

Noninstitutional care components

Home Care Services

Social Network

Community Services

Housing & Facilities

The most expensive disease in the Netherlands

10,8% of all Dutch healthcare spending

€ 10,600,000,000 (2020)

Data analyses

Econometrics

Epidemiology

Machine learning

?

Data sources

?

Expected Results

Policy Recommendations

Ultimate goals

No further cost rise

Less institutionalised care

Quality of life improvement for people with dementia

Community care

Less pressure on loved ones

Thank you!
